

## JAMES PROJECT AUTISM 101

**This program is a 4 hour program.**

**AUTISM 101:** This training gives an overview of the characteristics and possible behaviors of someone diagnosed with ASD. This is not a diagnostic training, but provides basic awareness of those on the Autism Spectrum. Teens and adults will be trained on how to respond to first responders and law enforcement.

**SENSORY SENSITIVITY:** A training that deals those on the Spectrum can be sensitive to their surroundings. It will address food aversion. Both children and adults on the spectrum can experience food aversion.

**EDUCATION(IEP/504 PLAN):** This training will help parents, caregivers and those with Autism understand an IEP and a 504 Plan. This training will help teach parents and students how to be self advocates.
